Theme: War

Dear Colleagues!

In my worst dreams I could not imagine that I would write to you about this!

However, in this situation, I decided that I have no moral right to remain silent.

I sincerely believe that by declaring a war on Ukraine, we all made a monstrous irreparable mistake!

Therefore, from this day on, I consider it my internal duty to do everything possible and impossible to stop this madness!

All these years, participating in the creation of the company, I dreamed of making our lives better.

Taking steps, making mistakes, correcting mistakes, together with you we created from scratch a leading role in the Russian and some international food markets. It took 25 years.

Today, none of that matters anymore.

I see no other purpose in life while the war is going on, other than to stop it.

I sincerely believe that if young guys would direct their energy to peaceful activities to create a wonderful life within our country, our people could be the happiest on the planet, and the whole world would look at our country with admiration.

By declaring our position, we can save the lives of many people.

And it doesn't matter what nationality these people have, what country they live in, or what language they speak.

Peace to you all!
